

Chicago - Navy Pier. Soviet shows individual tanks in and around the Filtration plant and more buildings at the pier head and along north side of river but omits the lock gates at North Pier. Bathymetric depths are different (eg 17 in outer harbour is 5.2 not 4.3, 13 SE of South Pier is 4.0 not 4.6) but land heights convert correctly (eg 592 at top left is 180.4). Soviet indicates wharfage alongside piers and by yacht club (lower centre).
