

Boston - Bannan Hill. Note interchange, ВУДС-КОРНЕР (Woods Corner) and street names on the right. Elevations in feet 269, 172 and 200 convert to 82.0, 52.4, 61.0. Soviet shows overhead power line but omits boundary NW-SE. The contour lines to the south of the interchange on US map suggest earthworks in preparation for southern extension of the N-S highway, which suggest that the layout shown on Soviet map is derived from aerial images. Object number 42 is listed as radio-electronics factory.
