

Washington DC - Alexandria.

left: USGS *Alexandria* 1965. centre: USGS *Alexandria* 1965, revised 1971 (changes shown in purple). right: Soviet *Washington sheet 3* compiled 1973 printed 1975 but evidently already out of date when compiled.

Soviet sheet shows new housing area south of Huntington Avenue, but not the new L-shaped building opposite. It shows one new building south of the trailer park (храм - temple) and the new road north of the railway, but not the other building by the trailer park, nor the one on the opposite side of Telegraph Road nor the new interchange at north end of Telegraph Road. It also has street names (Upland Place) in Shooters Hill area not on USGS. Object 102 is post office, 153 is marshalling yard.
