

Part of Washington 1:25,000 sheet 1 (compiled 1973, printed 1975) and J-18-A Washington 1:500,000 (compiled 1979, printed 1981)
The power transmission line running SW-NE and the road running NW-SE can be seen on both. Spot height of 97.2 on the large scale map is shown as 97 on the small scale sheet. The 'proposed' E-W road has evidently been built and the settlement at the Potomac cross roads has become more substantial.
